Outdoor IP65

Accent™ Series LED Strip Light

Product Data Sheet

Description

Our Outdoor (IP65) UltraBright™ Accent Series is the perfect choice for those wanting to uplift and revitalize any size space - inside or outside. With near-perfect color rendering and longer run lengths, these sophisticated lights are made to satisfy the desire for beauty and functionality. The weatherproof IP65 silicone cover promises complete protection against dust, can withstand powerful streams of water, and allows the strips to be easy to clean. Rediscover your favorite spaces and boast an even, bright line of light using minimal energy. Whether you want to brighten decks, beautify kitchens, or highlight your display windows, the IP65-rated Accent™ Series will truly reinvent your space.

15 Year
Warranty

Title 24 is regulated for lamps with color temperatures 4000K and below

Product Features

CRI	High CRI of up to 97
R9 and R13 Values	High R9 (99) & R13 (98) values
Lumens	Up to 300 lm/ft (985 lm/m)
Efficacy	Up to 80 lm/W
Voltage	12V and 24V DC Input
LEDs/Foot	73 LEDs/ft (240/m)
Beam Angle	120° Beam Angle
Ambient Temp	-4°F to 113°F (-20°C to 45°C)
PCB	4 oz copper
LED Pitch	3/16" (4 mm)
Strip Width	1/2" (12 mm)
Cutting Points	1" (25 mm)
Max Run Length in Series 12V*	32 ft (10 m)
Max Run Length in Series 24V*	49 ft (15 m)
LED Size	2216
Adhesive Type	3M VHB 9495 tape (IP65)
Dimmable	Yes
IP Rating	IP65, weatherproof protection

*To be in compliance with Class 2 and our UL Listing, the maximum run length of this strip may not exceed 26 ft (8 m) in 12V and 36 ft (11 m) in 24V. However, in terms of sheer voltage drop and reduction in brightness, the strip is able to be run 32 ft (10 m) in 12V and 49 ft (15 m) in 24V which would be outside the parameters of our UL certification.

Product Specifications

Product SKU	Color* (CCT)	Watts / Foot (Meter)	Lumen / Foot (Meter)	Luminous Efficacy (Lumens / Watt)	CRI	Gamut Score Rg (Color Sat.)	Relative Fidelity Score (RF)	TLCI (Qa)	CQS

Strip Light Connectors

SKU	Description	Wire Gauge	Amperage** Limit	Diagram
IP65-GRIP-SC-C1-10-40	Outdoor IP65 Grip Connector with 40" wire	20 AWG	5 Amps	
IP65-GRIP-SC-C2-10-08	Outdoor IP65 Grip Jumper Connector with 8" wire	20 AWG		
IP65-GRIP-SC-C3-10-0	Outdoor IP65 Grip Jumper Connector			

*Calculate max length of LED strip to follow the solderless connector based on an amperage draw of 0.3 A/ft (0.96 A/m) at 12 volts, 0.15 amps per foot (0.48 A/m) at 24 volts.

**Be sure no more than 5 amps is drawn after any solderless connector.

Strip Light Connectors Installation

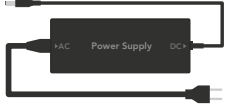

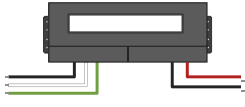

- Cut the LED strip light and the silicone sleeve on the cutting point you want to install the connector.
- Check the polarity and remove 2" of the adhesive tape and its backer from the back of the LED Strip light.
- Apply Silicone sealant liberally inside of the silicone sleeve until ensuring it is completely sealed.
- Slide the transparent case of your Outdoor IP65 Grip connector into the sleeve, until making sure that the strip is making proper contact.
- Grab the white plastic part of your connector and push the metal contacts through the window of the transparent case. Adjust it with pliers until you hear a click, and then let the sealant cure according to its own instructions.

Compatible Drivers (12V)

Safety And Disclosures

1. Installation must be in accordance with local and national electrical code regulations.
2. To ensure safety and correct installation, our strips are intended to be installed by a qualified, licensed electrician.
3. Only install with a Class 2 DC Constant Voltage LED driver to meet UL requirements.
4. Do not install in an environment where excessive heat may exist.
5. LED strip lights must be handled with care. Excessive handling, bending, and pressure may damage the product, voiding the warranty.
6. Do not secure this product with any kind of staples, nails, or materials that could potentially damage the product in any way. Keep these instructions for future reference.
7. Do not cover this product with any kind of combustible material such as paper, fabrics, etc.
8. Do not install within 5 feet of a swimming pool or spa.
9. Each maximum run requires a dedicated power feed from the driver. Do not extend beyond the recommended maximum run length.
10. Make sure the appropriate gauge wire is installed between the driver, LEDs, and any dimmers. When choosing wire, calculate voltage drop, maximum amperage rating, and the location ratings on the wire. Improper wire selection and installation could overheat wires, and cause fire.
11. Do not modify the product beyond instructions or warranty will be void.
12. We reserve the right to modify and improve the design of our fixtures without prior notice. Although we try our best to order the same colors every time, due to changes in technology and phosphors over time, we cannot guarantee to match existing installed fixtures for subsequent orders or replacements in regards to product appearance, CCT, or lumen output.
13. Do not install product with the majority of the product unsupported. Allowing the product to be suspended or dangling while installing may cause damage to the PCB due to the weight of the strip and/or spool.

Warranty Information

Limited Warranty

This product has a 15 year limited warranty from the date of shipment. This warranty only includes the main product outlined in this specification sheet and does not include the additional accessories that are used as a reference. Complete warranty details for fixtures and additional accessories are available at <https://www.flexfireleds.com/warranties/> within the Policies section. For warranty related questions please contact the product support team at (support@flexfireleds.com).

Consumer's Acknowledgment

Flexfire LEDs, Inc. stands behind its products when they are used properly and according to our specifications. When you purchase our products, you are agreeing to the terms and conditions outlined in our warranty section. We try our best to make recommendations, but the burden of proper installation, design, and maintenance relies on the purchaser. This limited warranty does not include product failures that are the result of: Not using a voltage regulated power supply to connect the LED product or controls; Connecting LED products to the wrong output voltage; Improper connection of power supplies, LED products, or controls; Connecting LED products or controls directly to any AC power source if they are stated for DC only input; Connecting power supplies backwards to an AC power source; Products used in an inappropriate location or in environmental conditions (temperature, humidity, moisture, etc.) outside the normal specified range; Water damage to products not specifically sold as waterproof products; Electrical power surges and spikes; Damage from hail, flooding, tornado, fire, wind, earthquake, lightning, electrical storm, or any other natural disasters or "force majeure" incidences; Damage caused by a vehicle or other accident; Damage caused when transporting the item; Damage to any products that were modified by the user, used for purposes other than as intended or directed, or connected to LED systems or components not purchased from Flexfire LEDs; Products that have been subjected to misuse, mishandling, misapplication or accident. Products used in connection with any components, devices or systems other than those explicitly approved as compatible with Company's products and listed on Company's website. Excessive wear and tear and/or physical or accidental abuse, loss, or theft. Improper repairs or warranty services performed by someone other than Flexfire LEDs will void this warranty.
